

Power Platform Consulting Services

A Division of General Networks

Take your organization's Power Apps production to the next level.

Creating Collaborative Solutions in SharePoint and Office 365

Compass365, the SharePoint/Office 365 services division of General Networks, provides design, development, implementation, training, and migration consulting services. As a leader in Microsoft forms, workflow and reporting technologies, we've delivered enterprise-grade Power Platform solutions that serve hundreds of users daily.

Our services range from deep dive training to full project scoping and delivery, through integrating your Power App with line of business solutions.

Let our team of experienced consultants guide your team through the development process or deliver your next complex form, workflow and/or reporting solution.

Utilizing the Power Platform and our proven methodology, our experienced consultants will help you:

- Replace a manual process or legacy application
- Automate a complex Excel based process
- Migrate from InfoPath or other forms solution
- Extend SharePoint with Power Apps

Power Platform Offerings

To meet your organization's unique needs, we offer several Power Platform packaged offerings, along with customized Power Apps consulting services.

To get started with one of our Power Platform offerings or to discuss a customized consulting services contact Cathy Ashbaugh, cashbaugh@compass365.com.

Power Platform & Your Business: 3-Day Proof of Concept

In this 3-day Proof of Concept, we'll review a business process of your choice and build a basic working Power Platform solution to demonstrate the value of implementing more efficient solutions using the Power Platform. The POC deliverable will serve as the foundation to develop a more complete and production ready Power Platform solution in the future.

- Analyze your selected business process
- Design the Power Apps and Flow solution that will be created
- Work directly with your business and IT staff to develop a working Power App
- Present Proof of Concept to your executive team

Deliverables:

- Functioning Power App, Power Automate and Power BI solution
- Report outlining the opportunity to further automate using Power Platform
- A deeper understanding of the value of utilizing the Power Platform in your business
