

Goodbye InfoPath, Hello Power Apps

Replace InfoPath with Power Apps

Many organizations have numerous InfoPath forms or SharePoint Designer workflows that need to be replaced before Microsoft support ends. Replacing with Power Apps sooner versus later provides an opportunity to modernize and take full advantage of the Microsoft ecosystem, making sure you don't get caught flat-footed if InfoPath is retired earlier than expected.

Why replace InfoPath now?

DEPRECATED TECHNOLOGY

- Outdated - low usability
- Costly to maintain
- Clunky in the cloud - mobile not supported
- Limited support resources
- Not fully supported in SharePoint Online

BENEFITS OF MODERNIZATION

- Cloud and mobile friendly
- Modern look and feel
- Rich ecosystem of connectors
- Opportunity to improve processes
- Future-proof solutions

RISKS OF DELAYING ACTION

- Looming retirement date
- Insufficient time to replace multiple forms
- Critical business process impacted if it breaks
- Lost opportunity to meet user needs

Contact us today to schedule a complimentary discovery session with one of our Solutions Architects.

Creating custom solutions to accelerate your digital transformation

We help you deliver faster, avoid mistakes, and incorporate Microsoft best practices

DISCOVERY

During this complimentary session, we run the SharePoint Modernization scanner to see where and how InfoPath is being used, determine expected business outcomes, and recommend next steps.

ASSESSMENT

We work with you to analyze the business purpose of each solution, identify, discuss, and address any potential issues, and envision ways to leverage modern technology. Using that data, we build and deliver an implementation roadmap.

DESIGN

We use this phase to re-engineer business processes, work iteratively with your team for feedback, incorporate and demonstrate feedback during design and playback meetings, and confirm the solution design.

IMPLEMENTATION

We rebuild efficiently in Power Apps, prepare users for User Acceptance Testing (UAT), develop and share user training and adoption guides, keep you informed with regular communications while deploying to production.

SUSTAINMENT

Our team will implement Application Lifecycle Management procedures and support you for two weeks post go-live. Optional agreements for ongoing escalation support and enhancements are also available.

Who we are

Since the Power Platform was launched in 2016, Compass365 has helped organizations successfully modernize hundreds of legacy InfoPath/SharePoint Designer solutions. Our team will design and deliver the right solution for your unique challenges.

ESTABLISHED IN 2007

We are the Microsoft 365 collaboration solutions services division of General Networks.

MICROSOFT GOLD PARTNER

Competencies include Cloud Productivity and Collaboration and Content.
