

Hi %%First-Name%%,

The 2024 Microsoft 365 Community Conference held earlier this month in Orlando, where AI integration took center stage, was as inspirational as it was informative.

Our highlights from the conference include:

1. **Copilot Integration:** Enhanced capabilities in Teams, SharePoint, and OneDrive for smart summaries, answers, and content management.
2. **Content Processing:** AI tools for automating business processes, improving content migration, and integrating eSignatures.
3. **Viva Updates:** New tools like Copilot Impact Dashboard and Viva Personal Insights to boost productivity and employee engagement.
4. **Modern Intranets:** Innovations in SharePoint for flexible, AI-ready intranets with user-centric design and real-time coauthoring.

Throughout the event, there was a big focus on getting ready for AI and learning the best ways to use these technologies to enhance collaboration and boost productivity.

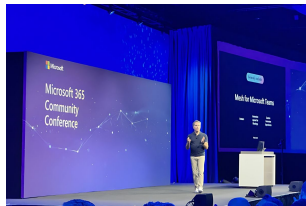

If you're thinking about rolling out Copilot in your organization or just exploring your options, Compass365 is here to help. Our Microsoft experts can offer consultations, training, and readiness assessments. Check out our [Modern Workplace services](#) or contact us today for a free consultation.

AI Readiness & Roadmap

Engage with us to assess your security, content, and organizational alignment and create a roadmap to implement Microsoft 365 Copilot.
