

Hi %%First-Name%%,

Our Business Applications team had an amazing time at the Power Platform Community Conference 2024 (PPCC 2024) last week. The star of the show was the evolution of Microsoft's low-code/no-code solutions and their integration with AI-driven innovations. Sessions and keynotes highlighted how Copilot and Copilot Studio are being integrated into Power Platform, enhancing automation and low-code app development. These tools use generative AI to simplify complex workflows, allowing users to create apps, bots, and reports using natural language rather than traditional coding.

Keep an eye on our blog posts as the Compass team will share what they learned at the event in the coming weeks. If you are new to the Power Platform or looking to expand your capacity in this exciting automation space, we can help.

## Get to Know the Compass Team

**Qais Gharib**  
Practice Manager | Microsoft Business Applications

As our Business Applications Manager, Qais leads our experts focused on the development and delivery of line-of-business solutions utilizing the Power Platform.

**Areas of Expertise:** Business process automations, data and reporting with Power Apps, Power Automate and Power BI, solutioning, architecture and delivery management.

*"I love helping our clients solve critical business problems with solutions that are easy to use, easy to maintain, take advantage of the Microsoft tools they already own, and provide great value to the organization. I especially enjoy recognizing and offering improvements to processes that the business users may not have thought of. This is delivering real value"*

- Qais Gharib

As always, the Compass365 team is here to assist you in improving the way your organization operates and your employees work with SharePoint and the Microsoft 365 platform. If you have a vision for driving improvements and would like to discuss your ideas with our team of Microsoft consultants, please reach out at any time.
