

Hi %%First-Name%%,

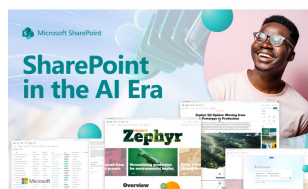

As a powerful content management platform, SharePoint enables users to develop engaging company intranets, streamline complex workflows, and develop essential business apps, all the while seamlessly integrating across Microsoft 365. To make it even stronger, Microsoft has taken an AI-forward stance with the platform. On January 29th Microsoft hosted "SharePoint: From concept, to creation, to impact", where they announced some exciting AI-focused updates.

Here's what's new:

- SharePoint Agents are AI-powered assistants that can do everything from answering questions, to assisting with onboarding, and even streamline complex tasks. These agents are fully customizable to meet your needs and work within existing SharePoint permissions, leaving security and governance intact.
- AI and UX – Several features have been added to help you create visually engaging intranet sites with ease:
 - *Create with Copilot* allows you to use prompts or templates to design pages.
 - Design ideas will help stimulate your creativity by providing design suggestions based on your content or content requirements.
 - Flexible sections expand your design area from 3 columns to all 12 on the SharePoint canvas.
- Autofill is enhanced with AI allowing you to extract key details from documents and automatically organize metadata using natural language prompts. To increase accessibility, Microsoft has lowered the SharePoint Autofill price to \$0.005 per page starting March 2025.

We are excited to explore these new features and assist our customers in understanding and adopting them as they roll out. If you have any questions about how you can take advantage of these features, please [contact us](#) to set up a chat.

Get to Know the Compass Team

Amber Roberts Sr. Solutions Architect

As a Sr. Solutions Architect for our Platform Services team, Amber supports our clients implementing SharePoint Online and Microsoft Teams-based solutions.

Areas of Expertise:

SharePoint Online, Microsoft Teams, OneDrive, Training, Legal, Records Retention, and Information Governance

Certifications: Certified Information Governance Officer, Advanced Certified Paralegal, Certified Scrum Product Owner

"Change is the essential process of all existence." - Spock

"I love helping clients make progress and meet their goals. Sometimes this is through business process improvement in SharePoint and using the Power Platform for forms and workflows. Sometimes it's through developing good Information Governance practices and automating retention and deletion of files. Sometimes it's training employees to be Power Users. Whatever your goals are, Compass365 is here to help!"

- Amber Roberts

As always, the Compass365 team is here to assist you in improving the way your organization operates and your employees work with SharePoint and the Microsoft 365 platform. If you have a vision for driving improvements and would like to discuss your ideas with our team of Microsoft consultants, please reach out at any time.
