

Hi %%First-Name%%,

An intranet is more than just a document repository—it is a strategic asset that connects your people to the knowledge, resources, and tools they need to thrive.

But for many organizations, intranets are outdated, neglected, and fragmented—leaving employees frustrated and disconnected. When your intranet isn't meeting user expectations, it impacts more than productivity:

- Employees waste time searching for information
- Important communications go unnoticed
- Content becomes outdated and untrustworthy
- Teams rely on shadow IT to get work done

The inefficiencies and sprawl created by a neglected or out of date intranet is why we recommend our clients build an intelligent intranet with Microsoft SharePoint. AI and the modern SharePoint experience helps enterprises:

- Deliver content that's relevant to each user with AI-powered search, personalized navigation, and dynamic page experiences.
- Seamlessly integrate with Microsoft Teams, Viva, and the full Microsoft 365 suite to create a centralized, cohesive digital workplace where communication and collaboration thrive.
- Microsoft Syntex and Viva Topics can be used to automatically surface critical knowledge, categorize content, and enable faster, smarter decision-making across your organization.
- Modern SharePoint sites are built with governance in mind—ensuring security, version control, and compliance while maintaining a great user experience.
- From global intranets to departmental portals, SharePoint offers the flexibility to grow with your business and adapt to your evolving needs.

Your intranet should empower your people—not frustrate them.

If you are ready to make the move, [let's talk](#) about how Compass365 can help you transform your intranet into a powerful, intelligent platform that supports your workforce and your strategic goals.

Microsoft 365 Community Conference

Join us in Las Vegas May 6-8 for the Microsoft Community Conference. We'll be sending our team to the event and if you would like to meet up, please reach out to schedule some time.
