

Hi %%First-Name%%,

At Compass365, we believe your intranet should do more than store documents, it should be the hub of your digital workplace. By integrating Microsoft 365 tools with your SharePoint intranet, you can connect communication, collaboration, and productivity tools into one seamless experience.

When SharePoint is integrated with Microsoft Teams, Viva Engage, and Power Platform, it stops being "just another tool" and becomes the place where everything comes together. Our recommendation is simple: don't think of these tools as separate projects. When you bring them together with SharePoint at the center, you create a connected, engaging experience that employees actually want to use.

Whether you need to revamp an existing intranet or build one from scratch, we can help. Download our free eBook [The Compass Guide to Building a Modern SharePoint Intranet](#) to get started or [contact us](#) anytime to see what's possible for your organization.

**Areas of Expertise:** Modern SharePoint intranets and portals, Akumina Employee Engagement portal services, custom webparts, integrations, solutioning, design and delivery team management.

*"Every single day I get the opportunity to solve problems, play with technology, and partner with our clients to help them achieve their business objectives. And, if that were not enough, my role at Compass365 allows me to do it alongside an amazing group of dedicated and expert consultants and developers. My team has yet to encounter a business problem we could not solve. It is one of the key reasons why our clients trust us to deliver."*

- Erik Perez

As always, the Compass365 team is here to assist you in improving the way your organization operates and your employees work with SharePoint and the Microsoft 365 platform. If you have a vision for driving improvements and would like to discuss your ideas with our team of Microsoft consultants, please reach out at any time.
